

SaaS Platform for Optimizing Renewable Energy Microgrids

Industry: CleanTech, Energy

Stage: Seed

Status: Est. 2019, Alpha, Paid Pilots, Raised \$500k grant (BIRD-F) 2019

Funding Requirement \$3m: 18 months program to complete product v 1.0 and first income (\$50k ARR)

Leadership:

Daniel Schwab, Founder, Co-CEO
Business Development

18 years in renewable energy.; BrightSource; founded, built and sold Kayema Energy to Fortune 500 company NRG Inc.

Elkana Pressler, Co-Founder,
Marketing, Product.

15 years of accomplishments.
Motorola, Orange, Comverse

Keith Lehman, Co-Founder, CTO. 16 years in developed AI and ML. Tokyo Electric Power, China Light and Power, Microsoft and Bank of America

Aviram Hadash, COO,
Western Digital

Haim Snir, Product Manager.
Big Panda, HP

Eli Israeli, Energy Analytics.
Siemens

Solution: Enable renewable energy microgrid financiers, designers, and developers more rapidly identify the optimal design thus achieving the ideal zero carbon at the "least cost" along with reliable energy supply

Revenue Model: B2B, SaaS license for energy developers, Utilities, Financiers, government

Our Market: USD 8 billion by 2025, at a CAGR of 17% during 2020-2025 (Adriot Research)

Value Proposition:

- Faster – more for less time
- Accurate – Better results
- CFO Friendly
- Future proof – Up to date
